ACTIVITY– INSTALLATION OF WATER BOOSTER PUMPS

Ref No:
Rev.No:0
Page 1 of 12

Serial No.	Sub-Activities	Hazards Identified (Generic & Task)	Risks Involved (People & Property)	Risk Rating			Control Measures	Residual Risk
				Severity	Probability	Initial Risk		
1.	Prepare work area	<ul style="list-style-type: none"> Unauthorized, untrained workers 	<ul style="list-style-type: none"> Cuts Abrasions 	2	A	L	<ul style="list-style-type: none"> TBT/DSTI to be conducted by the foreman/ safety officer prior to work commencement Task specific safety training to be provided Authorized personnel to undertake the job Daily safety inspection should be carried and eliminate the hazard. 	Low (ALARP)
2.	Manual Handling	<ul style="list-style-type: none"> Incorrect lifting of loads Sharp edges. Placing the object while fingers underneath. Slip/trip/fall (same level) Unsafe posture 	<ul style="list-style-type: none"> Back Injuries Cut to finger Strain Musculoskeletal Injuries 	3	C	M	<ul style="list-style-type: none"> Any lifting tasks shall be carried out by persons physically capable to do so No employee should be asked to carry loads above his capacity and in any case no load shall exceed 30kg per man. Mass of the load is more then to be equally shared Deploy enough number of personnel for lifting shall be appointed to the task depending upon the type of load to be lifted. Use easy mode of transport like trolley etc. Load not to be lifted above your shoulder Height Keep your fingers away from pinch point While placing the load Area to be illuminated with adequate lighting. Proper personal protective equipments to be used while manual handling of materials and loads. 	Low (ALARP)

3.	Stacking and Storing	<ul style="list-style-type: none"> Unauthorized, untrained workers Material fall from height Improper stacking Collapse of materials 	<ul style="list-style-type: none"> Crush Cut and abrasion Damage to property 	3	B	M	<ul style="list-style-type: none"> All materials shall be stored below 2 meter height. If the material is too heavy, use hydraulic trolley to shift the material. No storage of materials to be done in the work place, only required quantity to be taken for the job. Personnel protective equipment must wear at all time during the activity. (Helmet, shoe, vest, overall, gloves, goggles, mask.) 	Low (ALARP)
4.	Unloading , shifting of pumps to site using with trailer, pickup, fork lift and crane	<ul style="list-style-type: none"> Unauthorized, Untrained Workers Failure of lifting equipment Failure of lifting tools & tackles Unsafe lifting. Swinging of material Damaged sling/wire rope or a chain Poor maintenance of vehicle Speedy operation Over turn Over load 	<ul style="list-style-type: none"> Fatality Fractures Property damage Injury to personal Sprain and strain 	4	C	H	<ul style="list-style-type: none"> Ensure the crane and forklift engaged is tested and having valid license and the operator has valid license and approved 3rd party certificate. Engage trained and certified banks man. Lifting equipment, gears shall have third party Certificate and approval. Barricade and warning signs in to the area where lifting operation is carried out and restrict the entry. Check list should be carried out to their vehicles by the operator prior to start any work Use tagline for control of swing and alignment. The crane must be stopped when the wind speed exceeds 38km/hr. SWL should be clearly marked on the crane and should be check that is functioning. 	M (ALARP)
