No.		(Generic & Task)	(People & Property)	Severity	Probability	Initial Risk	Control Measures	Risk
							Colour coded system to be implemented to all lifting equipments as per the month.     Vehicle routes kept free of obstructions (with spillages being cleaned up promptly)	
4.	Stacking and Storing	Unauthorized, untrained workers     Material fall from height     Improper stacking     Collapse of materials	Crush     Cut and abrasion     Damage to     property	3	В	M	<ul> <li>All materials shall be stored below 2 meter height.</li> <li>If the material is too heavy, use hydraulic trolley to shift the material.</li> <li>No storage of materials to be done in the work place, only required quantity to be taken for the job.</li> <li>Personnel protective equipment must wear at all time during the activity. (Helmet, shoe, vest, overall, gloves, goggles, mask.)</li> </ul>	Low (ALARP)
5.	Working in excavated area	Material/equipment fall from height     Slip/trip/fall     Workers/ Pedestrians/ fall into excavation	Serious injury     Fatality     Property     Damage	3	D	M	Safe access and egress shall be provided     Barricade sensitive areas,     Ensure falling protection.     Use warning signboards in those areas.     Use Head protection strictly.     PTW to be applied and obtained prior to start work	Low (ALARP)

							Old/ empty container return to store for proper Dispose Container should check for leakage before Handling Personnel hygiene to be maintained while after use of chemicals All spillage shall be clean by sand or other absorbent materials Rubber gloves, overall, helmet, vest, shoe, Goggles, mask to be worn while during the activity		
12.	Operating with Thread Machine	Defective Machine     Improper use of Machine     Poor maintenance     Untrained, Unauthorized     Workers     Slip, trip and fall     Spillage	• Cuts • Crush • Skin Effect • Entanglement • Eye, finger injury • Fracture	3	С	M	Polythene sheets to be laid and drip trays to be placed below the machine to prevent spillages. Defective machine should not be used to perform a task. Only those persons who have been adequately trained and experienced in the use of the machine should be allowed to use the same. Machine should be maintained in good working Condition. All spillages must be clean immediately Waste oil should be disposed in an approved manner Operator should check the machine condition prior to start the work. Adequate lighting and ventilation to be Provided. Don't lay the cables around the access way, it should be proper routing Industrial distribution board and socket only to be used at site No joints shall be made in electrical cable.	M (ALARP)
